

January 14, 2019

Columbus Industries is pleased to announce the acquisition of the assets and intellectual properties of the 3M Filtrete Commercial HVAC filter product line that include the “Best in Class” 3M proprietary gasket system on the high performance V-Bank and Mini-Pleat filters.

This acquisition has enabled Columbus Industries to combine its already proven “Best in Class” proprietary high-performing media with the already proven “Best in Class” gasket technology.

The new product has been named the MICRO SHIELD® GS. The MICRO SHIELD® GS will be offered in a 2” Mini-Pleat and V-Cell Mini-Pleat MERV 11, 15, and 16/16A filter.

The MICRO SHIELD® GS has been engineered with the end user in mind, to provide superior performance in efficiency, resistance, and holding capacity. The MICRO SHIELD® GS will be the new standard for mini-pleat filtration.

The combination of the new MICRO SHIELD® GS and Columbus Industries’ already proven “Best in Class” MICRO SHEILD® 4” Mini-Pleat and 3V-Cell Mini-Pleat filters will provide our Customers a complete portfolio of the highest performing mini-pleat filters in the market.

Columbus Industries continues to be committed to our Customers with performance engineered, innovative solutions.
